

PUNIT WEIGHING AUTOMATION

Touchscreen Weighing Scale With Printer

Weigh, print barcode labels, manage inventory, verify dispatch and generate reports from one connected system.

0.200 mg - 10 ton	10.1 inch
Application-configured range	Industrial touchscreen
75 x 50 - 150 x 150 mm	5 years
Supported label sizes	Warranty

One workstation from weight capture to dispatch

Punit combines the weighing platform, 10.1-inch touchscreen, ribbon-based thermal-transfer label printer and Punit ERP into one operator-friendly system for industrial and retail workflows.

01	WEIGH Capture live gross, tare and net weight directly from the connected scale.
02	PRINT Generate product-specific barcode or QR labels immediately after weighing.
03	INVENTORY Create product-wise and detail-wise stock with a traceable ledger.
04	DISPATCH Scan labels, validate material, deduct inventory and issue a dispatch slip.

Built for both

INDUSTRIAL + RETAIL

Factories, warehouses, packaging stations, production lines, supermarkets, stores and other weight-based selling or material-control applications.

What the operator can do

Live scale connection	Product selection + tare	Custom label printing
Large live-weight display with stability status and direct capture.	Flexible product fields, optional range checks and kg/pcs conversion.	Logo, barcode, QR, batch, date, operator and weight fields.

Product specifications

The final model is configured against the material, safe loading method, required division, label workflow and installation conditions.

Weighing range	Configurations spanning 0.200 mg readability through 10-ton capacity
Platform dimensions	300 x 300 mm to 1800 x 1800 mm
Platform construction	Stainless steel (SS) and mild steel (MS) options
Touchscreen	10.1-inch operator touchscreen with Punit ERP
Label printer	Ribbon-based thermal-transfer barcode and QR label printer
Supported label sizes	75 x 50 mm to 150 x 150 mm
Power	Battery operation and standard mains power supply
Warranty	5-year warranty, subject to quotation terms and operating conditions
Installation	Remote and on-site installation options
Legal Metrology	1 year of default Legal Metrology coordination/support plus relevant product support
Operating modes	Cloud-based, offline fallback and hybrid cloud + offline sync
Indicative price	INR 25,000 to INR 2,00,000 depending on configuration

Important: The listed range covers multiple product configurations. Capacity, readability, platform size, printer model, battery backup and regulatory scope are finalized in the approved quotation.

Software inside the touchscreen

Punit ERP connects live weighing, barcode labels, inward, inventory, dispatch and reports so the physical material and digital record stay linked.

WEIGH + LABEL - Live Bluetooth scale connection - Gross, tare and net calculation - Product-specific tare and optional range - Barcode and QR label templates	INVENTORY + DISPATCH - Product/detail-wise inventory - Inventory ledger and adjustments - Barcode-based dispatch validation - Dispatch slip and packing list
CLOUD + OFFLINE - Android operator app - Laravel cloud web panel - Offline fallback and controlled sync - Multi-user and permission foundation	REPORTS + TRACEABILITY - Inward and dispatch reports - PDF, Excel and CSV export - Audit and barcode history - Custom report headers and columns

REQUEST A DEMO + CONFIGURATION

Tell us what you weigh and what the label must contain.

Share your required capacity, platform size, label size, application and installation city. Our team will recommend the correct configuration.
